Re: Horsham Water & Sewer Authority  
County Line Road Area Water Infrastructure Improvements  
Area A Flow Transfer Sewer Project  
Springbrook Lane Pump Station

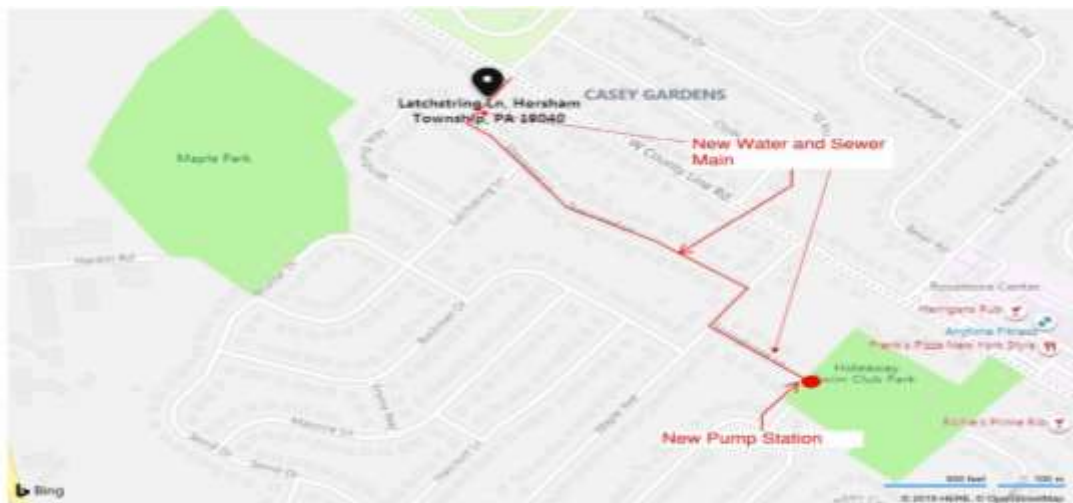

Dear Resident,

As a follow up to our September 2019 communication, this is to advise you that the contractor performing the pump station construction on the Hideaway Swim Club property with access via the end of Springbrook Lane is scheduled to mobilize to the site during the week of February 3, 2020. The contractors for the pump station are PSI Pumping Solutions, Inc., of York Springs, PA. and AJM Electric, Inc. of Chester, PA. The pump station construction is one element of a larger project involving a total of four contracts.

The pipe work currently being performed in your neighborhood by Almeida and Hudak Contractors of Plymouth Meeting, PA is progressing. Almeida and Hudak is now moving forward with pipe work in Maple Avenue. The portion of the work on Maple Avenue will involve periodic road closures. Traffic controls will continue to be in place and lanes will be restricted as necessary throughout the project area. Work on Maple Avenue is anticipated to be ongoing during the hours of 7 AM to 4 PM through approximately February 7, 2020. As always, access to local traffic, emergency services, school busses, and trash service will be maintained.

As a reminder, if you are served by public water and your home is currently connected to the water main being replaced, your water service will ultimately be disconnected from the existing water main and reconnected to the new main. There is no cost to you for this work, but when the time comes for your water service to be switched over to the new main, there will be a short interruption in service, in the range of 1-2 hours. This work will be coordinated directly with you at that time.

A map depicting the project area is provided below:

With the exception of any surface facilities being constructed, such as the pump station, shifting of fire hydrant(s), installation of valves and/or manholes, the work areas will be restored to as close to preconstruction conditions as possible. Permanent restoration will occur this spring.

As with all construction projects, weather and other factors can cause schedules to change faster than we can advise you by standard mail communication. In order that we may provide you with updates or schedule changes, if you have not already signed up for updates on the “County Line Road area infrastructure improvements” project, please do so. You may also wish to sign up for updates on the project entitled *Area A Flow Transfer*. You may do so by going to the Authority’s website at <https://www.horshamwater-sewer.com/customer-updates>. Please be assured that your email address will only be used for the purpose of informing you of Authority business.

Should you have any questions about this project, please feel free to contact our office.

Very truly yours,

Tina M. O'Rourke  
Business Manager
