Re: Draft SAP for Installation and Sampling of Off-Site Monitoring Wells for PFAS, July 2019  
Draft SAP for PFAS Surface Water and Sediment Sampling, May 2019

Dear Willie, Sarah and Colin,

Please see the attached letters, on which you were all copied via email. The Authority appreciates the opportunity to review the plans and is grateful that the Navy's efforts are expanding outside of the fenceline. Based on our review, the Authority believes that significant data gaps will exist if the SAP for off-site monitoring is carried out as currently drafted. Before either plan advances further through the regulatory review process, the Authority requests a meeting with the Navy, DEP and EPA to discuss how the HWSA wells may be included in the off-site monitoring plan and to discuss the other comments within the attached letters.

We appreciate your consideration of the Authority's request and look forward to meeting.

Very truly yours,

Tina M. O'Rourke  
Business Manager
